## **United States Antimony Corporation Announces Participation at the iAccess Alpha Buyside Best Ideas Fall Conference**

*"The Critical Minerals and ZEO Company"*

THOMPSON FALLS, MT / ACCESSWIRE / September 23, 2024 / United States Antimony Corporation ("USAC", or the "Company"), (NYSE:UAMY) announces today that management is participating in the iAccess Alpha Buyside Best Ideas Fall Conference 2024 on September 24 and 25, 2024. On behalf of the Company, Gary C. Evans, Chairman and Co-CEO, will deliver a company presentation at 11:30am ET on September 24<sup>th</sup>, and host one-on-one meetings the following day, September 25<sup>th</sup>.

iAccess Alpha hosts virtual investor conferences, where presenting companies are recommended by investors. The conference format spans two days, with company webcast presentations on day one, followed by one-on-one meetings with company management teams on day two.

To learn more about the iAccess Alpha Buyside Best Ideas Fall Conference 2024 on September 24 and 25, 2024 or to register and schedule a one-on-one meeting with USAC, please visit the conference website <https://www.iaccessalpha.com/home>.

The presentation will be webcast live and available for replay at: <https://www.webcaster4.com/Webcast/Page/3064/51218>.

The webcast of the USAC presentation will also be available on the company's website under the Investors tab at: <https://www.usantimony.com/investors>.

### **About USAC:**

United States Antimony Corporation and its subsidiaries in the U.S. and Mexico ("USAC", the "Company", "Our", "Us", or "We") sell processed antimony, zeolite, and precious metals products in the U.S. and Canada. The Company processes antimony ore primarily into antimony oxide, antimony metal, and antimony trisulfide. Our antimony oxide is used to form a flame-retardant system for plastics, rubber, fiberglass, textile goods, paints, coatings and paper, as a color fastener in paint, and as a phosphorescent agent in fluorescent light bulbs. Our antimony metal is used in bearings, storage batteries, and ordnance. Our antimony trisulfide is used as a primer in ammunition. In its operations in Idaho, the Company mines and processes zeolite, a group of industrial minerals used in soil amendment and fertilizer, water filtration, sewage treatment, nuclear waste and other environmental cleanup, odor control, gas separation, animal nutrition, and other miscellaneous applications. We recover certain amounts of precious metals, primarily gold and silver, at our plant in Montana from antimony concentrates.

### **Forward-Looking Statements:**

Readers should note that, in addition to the historical information contained herein, this press release may contain forward-looking statements within the meaning of, and intended to be covered by, the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements are based upon current expectations and beliefs concerning future developments and their potential effects on the Company including matters related to the Company's operations, pending contracts and future revenues, financial performance, and profitability, ability to execute on its increased production and installation schedules for planned capital expenditures, and the size of forecasted deposits. Although the Company believes that the expectations reflected in the forward-looking statements and the assumptions upon which they are based are reasonable, it can give no assurance that such expectations and assumptions will prove to have been correct. The reader is cautioned not to put undue reliance on these forward-looking statements, as these statements are subject to numerous factors and uncertainties. In addition, other factors that could cause actual results to differ materially are discussed in the Company's most recent filings, including Form 10-K and Form 10-Q with the Securities and Exchange Commission.

Forward-looking statements are typically identified by words such as "believe," "expect," "anticipate," "intend," "outlook," "estimate," "forecast," "project," "pro forma" and other similar words and expressions. Forward-looking statements are subject to numerous assumptions, risks and uncertainties, which change over time. Forward-looking statements speak only as of the date they are made. Because forward-looking statements are subject to assumptions and uncertainties, actual results or future events could differ, possibly materially, from those anticipated in the forward-looking statements and future results could differ materially from historical performance.
